

In this summer work we are going to craft a vacational summer post-card using photopea: <https://www.photopea.com/> (a online free alternative for editing images).

1. Step: The first step will be to take a picture of our summer trip or excursion. beaches and summer topics can work great, but you can be creative with them. If you are in a situation in which you are stuck at home, you can borrow a picture from the internet.

Keep in mind that in this stage we should focus especially on the topic and the composition of the image. If you use the grid of thirds in your Ipad/smartphone/camera might be handy

How to activate it on IPAD: <https://www.youtube.com/watch?v=Qf0Vm2raStU>

How to activate it on smartphone: <https://www.youtube.com/watch?v=lcrEk7afOE8>

I recommend you read about composition theory if you are not familiar with it. In the following links, you can find information about it.

2. Step Open your image in Photopea. Add a text with a pretty Font indicating the name of the place.

You can download fonts from dafont: <https://www.dafont.com/es/>

3. Edit your image using the parameters you will find in “imagen” like “Tono y saturación”, curvas, “Intensidad del color”. Try to improve the image as much as you can.

4. Search on Google Images for a seal and add a ton on top using a different layer.

5. Save the postcard in .png format.
